

Course: ENSF 607 – Fall 2020

Lab#: 05

Student Name: Nathan Jack

Due Date: October 27th, 2020

Exercise 1:

See Java Files.

Exercise 2:

Each task was given 5 threads as seen in the code. Each exercise generates a new set of random numbers and a new set of threads. Results were confirmed by printing to screen each generated at time of generation and then again in the results list before printing. Below output generates using Ex_Tester.java.

```
Task 1 Threads starting  
Sum of all threads random number: 390  
Task 2 Threads starting  
Sum of all threads random number: 219  
Task 3 Threads starting  
Sum of all threads random number: 194
```
